

Foam Building Products

Joint expansion foam is available in sizes ranging from 50mm – 300mm and comes in 25m rolls. Both adhesive and non-adhesive rolls are available. Rigid lengths of Expansion Foam are available in 2.4m lengths.

Open Cell Backing Rod is supplied in a range of diameters up to 25mm. It can be stretched, compressed or bent conforming to irregular shaped joints. Because of its resilience and co-efficient of friction it will remain as placed. It forms an excellent backing material for all types of sealants, in horizontal and vertical applications.
